Summary

Backend-focused Software Engineer with experience in building scalable web applications using the **MERN stack**. Skilled in developing RESTful APIs, authentication systems, and database-driven applications using **Node.js**, **Express.js**, **MongoDB**, and **React.js**. Experience with API testing, debugging, and backend performance optimization.

Education

Bachelor of Technology (Computer Science)

Sunder Deep Engineering College, Ghaziabad
CGPA: 7.61

2021 – 2025

Technical Skills

- **Languages:** JavaScript, HTML, CSS, SQL
- **Frontend:** React.js, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, Redis
- **Tools:** Docker, Git, Postman, VS Code
- **Concepts:** REST APIs, Authentication, JWT, API Integration

Experience

Software Engineer Trainee — Chetu India Pvt. Ltd.

Aug 2025 – Present

- Developed and maintained **RESTful APIs** using **Node.js** and **Express.js** for scalable backend services.
- Implemented authentication and authorization using **JWT-based authentication** and secure cookie handling.
- Integrated backend services with **MongoDB** databases and optimized queries for improved performance.
- Debugged backend services and tested APIs using **Postman**.
- Followed clean coding practices and modular architecture for maintainable server-side code.

Microsoft Learn Student Ambassador

Sept 2023 – Sept 2024

- Organized workshops and cloud skill challenges focused on **Microsoft Azure and AI technologies**.
- Helped **100+ students** explore cloud computing, AI tools, and certification programs.
- Conducted technical sessions and community events to promote developer learning.

Projects

Job Portal – MERN Stack

- Built a full-stack job portal platform with two roles: **Recruiter** and **Job Seeker**.
- Implemented features including job posting, job applications, profile management, and authentication.
- Developed backend APIs using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented secure authentication using **JWT** and cookie-based sessions.

Doctor Appointment Booking System – MERN Stack

- Developed an online appointment booking system allowing patients to schedule appointments with doctors.
- Built backend APIs using **Node.js** and **Express.js** and integrated with **MongoDB**.
- Implemented doctor listing, appointment scheduling, and user authentication modules.
- Developed responsive frontend using **React.js** and **Tailwind CSS**.

Leadership & Achievements

- **Founder & Lead – HackerWorld Programming Club:** Built and led a programming community of 50+ students focused on coding practice and tech events.
- **Best Coordinator – Sanketh 2024 Tech Fest:** Managed technical event operations and coordination for large student participation.
