

Himanshi Agrawal

Mathura, India +91-8279499878 agrawalhimanshi4@gmail.com www.linkedin.com/in/himanshiagrawal13

Professional Summary

Developed a strong foundation in **Core Java**, including **object-oriented programming** concepts such as **classes**, **inheritance**, **polymorphism**, **exception handling**, **multithreading** and **collection framework**. Implemented database-driven applications using **SQL** and **JDBC**, with hands-on experience in performing **CRUD operations** and managing data efficiently. Designed simple and structured user interfaces using **HTML** and **CSS basics** to support application front-end requirements. Demonstrated the ability to write clean, logical, and maintainable code while working on academic and self-learning projects. Eager to begin a career as a **Java Developer**, contribute to real-world software solutions, and continuously enhance technical and problem-solving skills.

Technical Skills

Programming Language: Core Java

Database: SQL, MySQL

Advanced Java: JDBC, Hibernate, Spring Core, Spring ORM

Web Technologies: HTML, CSS

Tools & IDEs: Eclipse, Visual Studio Code

Project

1. Railway Ticket Booking System

- Designed and developed a console-based Railway Ticket Booking System using **Core Java**, enabling users to book, cancel, and view train tickets through a menu-driven interface.
- Applied **Object-Oriented Programming (OOP)** principles such as **classes**, **objects**, **encapsulation**, and **constructors** to create a modular and maintainable application structure.
- Implemented seat management using **arrays**, where each index represents a seat and stores passenger details dynamically at runtime.
- Developed a Train module to handle all major operations including seat booking, seat cancellation, seat availability checking, and displaying booked tickets.
- Built a **custom exception** to handle cases such as invalid seat numbers, already booked seats, and cancellation of empty seats, improving system reliability..

2. Quiz Game

- Architected and implemented a Quiz game using **Core Java**, enabling interactive user participation and role-based system control.
- Developed **separate service classes** using **Java** to handle admin operations (question management and score viewing) and user operations (quiz attempt and score calculation), ensuring clear separation of responsibilities.
- Designed and integrated a **MySQL** relational database schema to store quiz questions and user results, utilizing auto-incremented primary keys for efficient data handling.
- Implemented **dynamic question retrieval logic** using **SQL** to randomly fetch quiz questions from the database, providing a varied quiz experience for each user session.

Education

Bachelor of Technology in Computer Science and Engineering

2021- 2025

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Interpersonal Skills

- Problem Solving
 - Teamwork
 - Adaptability
-

Course

Java Full Stack Development (Remote)

July 2025- Present

Fusion Software Institute (Pune)

Personal Details

Name: Himanshi Agrawal

DOB: 13th December 2003

Languages: English and Hindi
