ABOUT ME

Java Backend Developer with 2 year of experience in building secure, scalable REST APIs using Spring Boot and Spring Security. Hands-on experience in authentication (JWT, OAuth2), and enterprise application development. Strong in API optimization, validation, and error handling.

SKILLS

- Core Java
- Spring Boot
- Spring Security
- JWT, OAuth2
- My SQL
- RESTAPI, Validation, Error handling
- XML Processing

TOOLS

- Git
- Docker
- SendGrid
- BookStack API

EDUCATION

MCA(Pursuing) - Vivekananda Global University (2024-2026)

BCA - University Maharani College (2018-2021)

ACHIEVEMENTS

- Delivered multiple backend feature for enterprise-grade applications.
- Implemented secure authentication and authorization system.
- Improved API performance through optimized queries and backend logic.

EXPERIENCE

SOFTWARE ENGINEER - LOGICMINES Aug 2024 - Dec 2025
INFOTECH LLP

Bzctrl - Task and Documentation Management System

- Developed and enhanced REST APIs for task Management, recurrence automation.
- Implemented XML upload API with JSON response transformation.
- Integrated BookStack API for centralized documentation management.
- Improved search and follow-up task retrieval features.
- Built task-to-incident conversion APIs to increase workflow flexibility.
- Implemented SendGrid email notification for user on boarding and role updates.
- Optimized APIs for performance, scalability, and reliability.

Fisheries Inspection - Fishing Inspection Application

- Designed complete backend architecture with secure authentication.
- Implemented account lifecycle APIs (create, update, delete, list).
- Built custom password grant with JWT based authentication.
- Developed password reset, role management, and profile APIs.
- Ensured robust validation and error handling across services.

JAVA INTERN - CODEPLANET June 2022 - October2022
TECHNOLOGIES

Smart Contact Manager - This project is related to contact manager, where we can manage our contact like we can view our contact, add a new contact, delete existing contact, updated existing contact. Basically this project provides facilities to store your contact in our application.

- Created API for add contact, update contact, view contact, get contact, delete contact.
