SUMMARY

Full-Stack MERN Developer experienced in designing and deploying responsive web applications and AI-driven systems. Built and optimized RESTful APIs, secure authentication flows, and real-time features using React, Node.js, and MongoDB. Developed an AI chatbot leveraging vector databases and LLM integration to deliver intelligent, context-aware responses.

EXPERIENCE

Bitmax Technology(Full Stack Developer)

DEC:2025-PRESENT

- Designed and implemented JWT-based authentication with role-based access control.
- Built a responsive, authenticated React UI with smooth animations and protected routes.
- Integrated real-time features using WebSockets and WebRTC.
- Developed secure REST APIs and tested end-to-end flows using Postman.

PROJECTS

BT-ERP - Enterprise Resource Planning Platform :

- Developed a comprehensive multi-tenant SaaS ERP system serving educational institutions with role-based access control and subscription-based feature management
- Optimized database schema with hierarchical relationships supporting 15+ models, ensuring data integrity and efficient query performance
- Implemented robust security with JWT authentication, RBAC permissions, audit logging , subscription-based feature gating
- Built modular frontend with React.js, featuring reusable components (Form, SearchAndFilter, DataCards) and responsive design with TailwindCSS

[VIEW](#)

E - COMMERCE PLATFORM :

- Built a full-stack e-commerce app with React frontend and Node.js backend.
- Developed RESTful APIs for products, user auth, cart, and orders using MongoDB.
- Implemented dynamic product listings, filtering, and protected routes. Designed
- responsive UI with Tailwind CSS for a seamless user experience.

[VIEW](#)

AI POWERED CHATBOT SYSTEM :

- Built a full-stack intelligent chatbot combining Pinecone vector database with local Llama3 AI to deliver context-aware responses from uploaded documents. Implemented Node.js/Express backend with MongoDB for user management and Next.js/Redux frontend with real-time admin dashboard. Achieved 100% cost reduction by eliminating external AI APIs while maintaining 95% accuracy in document retrieval and sub-second response times.
- Technologies: React, Next.js, Node.js, MongoDB, Pinecone, Llama3, Redux, JWT
