

TEJAS SHARMA

New Delhi, India | +91-8950603672 | thetejasharma@gmail.com | [LinkedIn](#) | [GitHub](#)

- Engineered real-time multimodal AI system integrating computer vision and speech recognition (<2s latency)
- Built AI-driven chatbot automating academic queries across 500+ records with 60% faster resolution
- Skilled in Python, TensorFlow, API integration, and data-driven backend system design

EDUCATION

The Technological Institute of Textile & Sciences | Bhiwani, Haryana Aug 2023 – May 2027

B.Tech in Computer Science Engineering | CGPA: 8.2 / 10

EXPERIENCE

AI/ML Intern — Infosys Springboard (Virtual)

Tech: Python, TensorFlow, OpenAI Whisper, Streamlit

- Built a production-level multimodal assistive AI system integrating object detection and speech recognition
- Designed and optimized model pipeline through 4+ evaluation cycles, improving inference efficiency and system responsiveness
- Implemented real-world deep learning workflows including model selection, preprocessing, and deployment Constraints.

PROJECTS

Real-Time Assistive AI System — Multimodal Audio & Vision

Capstone Project, Infosys Springboard | Python · TensorFlow SSD · OpenAI Whisper · COCO Dataset

- Built a real-time assistive system combining TensorFlow SSD object detection and OpenAI Whisper speech recognition, delivering concurrent audio-visual processing with sub-2s response latency.
- Engineered a parallel multimodal data pipeline to preprocess audio streams and vision frames simultaneously, reducing inference lag by ~35% versus a sequential baseline.
- Trained and evaluated the SSD model on COCO (80 object classes); integrated automated speech feedback to surface detected objects as spoken output for accessibility scenarios.

EduBuddy — AI-Powered Academic Query Chatbot

Python | Supabase | REST APIs | NLP

- Designed and shipped an AI chatbot resolving student academic queries via structured institutional data, cutting average query resolution time by ~60% vs. manual lookup.
- Optimized retrieval logic and schema design in Supabase, improving response relevance across 500+ categorized academic records.
- Implemented user-note uploads for personalized data access, increasing estimated session engagement for repeat users by ~40%.
- GitHub: <https://github.com/Tejas-Sharma-1/EduBuddywithSupaBase>

Smart India Hackathon — Analytical Web Platform 2024, 2025

Node.js | MongoDB | REST API | Team of 6

- Delivered a full-stack data analytics platform with a 6-person team under a 36-hour deadline, placing among top regional submissions.
- Architected MongoDB storage and retrieval workflows supporting real-time querying across 10,000+ records with consistent sub-300ms response times.
- Applied modular development practices that reduced cross-team integration conflicts by ~50%, enabling parallel feature development.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript

Data Science & ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

Databases: SQL, MongoDB

Web (Supporting): React.js, Node.js, Express.js, HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Postman

CERTIFICATIONS

- IBM AI Foundations for Business — IBM (2024)
- Python for Data Science — NPTEL (2023)
- Full Stack Web Development with React — Coursera (2024)
