TryHackMe

GeeksForGeeks

Summary

Final-year B.Tech student specializing in Cybersecurity and VAPT. Hands-on experience with penetration testing, OSINT, and audit-ready reporting. Skilled in tools like Burp Suite, Nmap, Amass, and SQLmap, with proven ability to uncover vulnerabilities and deliver actionable security recommendations. Passionate about building scalable, civic-minded tech solutions to safeguard digital infrastructure.

Education

United Institute Of Technology

Bachelor of Technology in Computer Science Engineering

Ambika Public School

Intermediate – 2022 – CBSE

High-School – 2020 – CBSE

Expected May 2026

Prayagraj, UP

Prayagraj, UP

Technical Skills

Technologies: Burp Suite, Metasploit, Active Directory, Nmap, Nessus, Owasp Zap, Shodan, Subfinder, Amass, SQLmap, Censys, Wireshark

SIEM Tools: Splunk, Microsoft Sentinel

Concepts: Networking Basics (TCP/IP, OSI Model, Subnetting), Vulnerability Assessment, Penetration Testing, Open-Source Intelligence (OSINT), Security Frameworks (OWASP Top 10, NIST, MITRE ATTACK)

Experience

TechDefence Labs Solutions Ltd.

Delhi

VAPT Intern

Nov 2025 – Present

- Performed security auditing for government client sites, identifying vulnerabilities and strengthening infrastructure.
- Applied Nessus Professional, Burp Suite, Nmap, and Shodan for vulnerability scanning and penetration testing.
- Mapped findings to MITRE ATT&CK framework to align with industry-standard threat modeling.
- Delivered audit-ready reports with actionable recommendations to improve system security posture.

Effervescence, IIIT Allahabad

Remote

Ethical Hacking Training

Nov 2023 – Jan 2024

- Completed ethical hacking summer training, gaining foundational understanding of security concepts.
- Acquired hands-on experience in penetration testing, network basics, and vulnerability assessment.

HackersForYou

Remote

Penetration Testing Intern

Aug 2023 – Oct 2023

- Strengthened knowledge of networking concepts (TCP/IP, OSI model, subnetting) through practical labs.
- Applied Burp Suite, Nmap, and SQLmap to perform penetration testing and vulnerability assessments via TryHackMe and CTFs.

Projects

Object prediction using A.I | Python, YOLO, Deepsort, Google collab, Open-CV

work in progress

- Designed and implemented an object detection system using Python and YOLO for real-time predictions.
- Utilized Google Colab to streamline development and leverage GPU capabilities for faster processing.
- Utilized tools like Python, OpenCV, YOLO, and Google Colab to develop and implement real-time object detection systems with annotated outputs for enhanced visualization and analysis.
- Visualized detection results by annotating outputs for effective understanding and analysis.

Vulnerability Assessment and Penetration Testing (VAPT) | Burpsuite, Subfinder, Amass, shodan, Exploit-DB, Sqlmap

November 2024

- Conducted a security audit of United ERP (student.icampuserp.in), uncovering critical vulnerabilities affecting 70% of users.
- Discovered vulnerabilities, including OTP bypass and SQL injection, enabling unauthorized access through login bypass and exposing sensitive user data.
- Utilized tools like Burp Suite, Nmap, and Shodan to detect and analyze vulnerabilities.
- Delivered actionable recommendations to enhance system security and safeguard user data.

Basic Vulnerability Scanner | Python, Nmap, wappalizer, shodan

July 2023

- Developed a Python-based vulnerability scanner to identify website security risks.
- Key Features: Identified missing security headers, open ports (HTTP, HTTPS, unknown services), and server information.
- Technical Skills: Python, Networking Basics, Cybersecurity, Data Parsing, Libraries.

Certifications & Achievements

- Secured 3rd Rank in MNNIT Bootcamp** – Showcased skills in system vulnerability detection, spoofing attacks, flooding techniques, and network traffic analysis using Wireshark..
- Letter of Appreciation** – Recognized for reporting SQL, XSS, OTP Bypass, and Account Takeover vulnerabilities, improving the college ERP system's security.
- Practical Ethical Hacking (PEH) Certification – TCM Security** – Learned penetration testing, vulnerability assessment, Active Directory exploitation, and use of tools like Metasploit and Nmap
- Pre-Security Path Certification – TryHackMe** – Gained foundational skills in networking, Linux, Windows security, web vulnerabilities, and threat analysis.
