

# ANKIT KUSHWAHA

Android & Flutter Developer

ankitkushwaha038@gmail.com | +91 9685808261 | GitHub | LinkedIn | Noida, India

## PROFESSIONAL SUMMARY

---

Results-driven Android & Flutter Developer with 4+ years of experience designing and delivering scalable, high-performance cross-platform mobile applications for e-commerce, lottery, pet-care, and entertainment platforms. Proficient in Flutter/Dart, Java, Clean Architecture, Bloc/Provider state management, Firebase, REST API integration, and payment gateway implementation (Razorpay, Stripe, Tap). Demonstrated track record of publishing production apps on Google Play Store and Apple App Store, reducing crashes with Firebase Crashlytics, and collaborating cross-functionally to ship features on schedule.

## KEY ACHIEVEMENTS

---

- Built and deployed 4+ production mobile apps (Flutter & Native Android) serving real users on Play Store and App Store.
- Implemented secure payment integrations — Razorpay, Stripe, and Tap — processing live transactions in e-commerce and lottery apps.
- Reduced production crash rates by integrating Firebase Crashlytics for real-time monitoring and issue resolution.
- Designed and maintained Clean Architecture codebase adopted across multiple projects, improving code maintainability and test coverage.
- Integrated Google Maps SDK for location-based services in a live pet-care platform used across multiple cities.

## TECHNICAL SKILLS

---

**Languages:** Dart, Java, XML

**Mobile Frameworks:** Flutter (cross-platform), Android SDK (native)

**Architecture:** Clean Architecture, MVVM

**State Management:** Bloc, Cubit, Provider

**Backend & APIs:** REST API, Retrofit, Dio, Firebase (Auth, Firestore, FCM, Crashlytics)

**Local Storage:** Hive, Room DB, SharedPreferences, Flutter Secure Storage

**Payment Gateways:** Razorpay, Stripe, Tap Payment Gateway

**DevOps & Tools:** Git, GitHub, Android Studio, Google Play Console

**Other:** Google Maps SDK, Push Notifications, Barcode/QR Scanning, POS Integration

## PROFESSIONAL EXPERIENCE

---

**Android & Flutter Developer** | **AlgoSoft Apps Technologies**, Noida *Jul 2022 – Dec 2025*

- Developed and maintained cross-platform Flutter applications and native Android (Java) apps for e-commerce, lottery, and service-based clients.
- Architected scalable solutions using Clean Architecture and Bloc state management, reducing code duplication and improving long-term maintainability.
- Integrated REST APIs, Firebase Realtime Database, Firestore, and Firebase Cloud Messaging for real-time data and push notifications.
- Implemented Google Maps SDK for location-based features and configured payment gateways (Tap, Razorpay) for secure in-app transactions.
- Monitored app stability using Firebase Crashlytics; investigated and resolved production crashes to improve user retention.
- Managed end-to-end app release cycles — build signing, Play Store submission, and App Store deployment — for multiple production apps.
- Collaborated with UI/UX designers, backend engineers, and QA teams in Agile sprints to deliver features within deadlines.

## **Android Developer** | **Apphouse Solutions**, Kaushambi, Ghaziabad *Dec 2021 – Jul 2022*

- Built Android features using Java, integrated REST APIs, and supported Firebase-based backend services for client mobile products.
- Participated in code reviews, bug triage, and QA handoffs to ensure consistent release quality.

## **KEY PROJECTS**

---

### **Frisbee – Pet Care Service Platform** — *Flutter | Cross-Platform*

On-demand pet services app covering grooming, boarding, veterinary care, e-commerce, and adoption.

- Developed full app UI and feature modules in Flutter/Dart following Clean Architecture principles.
- Integrated Google Maps SDK for real-time location-based service discovery near the user.
- Implemented Tap Payment Gateway for secure, seamless in-app transactions.
- Configured Firebase Crashlytics for production crash monitoring and Firebase Cloud Messaging for push notifications.

**Tech Stack:** Flutter, Dart, Firebase (Crashlytics, FCM), REST APIs, Tap Payment, Google Maps SDK

### **UWinn – Lottery & E-Commerce App** — *Flutter | iOS*

Lottery and voucher purchase app featuring Quick2, Fast4, and Power7 game modes with a smooth, engagement-focused UX.

- Built responsive UI screens and navigation flows for lottery ticket purchase, voucher browsing, and product listings.
- Connected app to REST APIs for real-time game data, ticket validation, and order processing.
- Integrated push notifications to alert users of results, offers, and account updates.

**Tech Stack:** Flutter, Dart, Firebase, REST APIs, Push Notifications

### **BWinn – Reward & Lottery App** — *Native Android | Java*

Android lottery and rewards app with barcode scanning, POS printing, and multiple game modes.

- Developed a full application in Java with a clean, intuitive interface for ticket selection and coupon purchasing.
- Built barcode/QR scanning functionality for quick ticket verification and processing.
- Integrated custom POS device support for printing physical transaction receipts and slips.
- Connected REST APIs for real-time backend communication; used Firebase for notifications and performance.

**Tech Stack:** Android (Java), REST APIs, Firebase, Custom POS Integration, Barcode/QR Scanning

### **HotHouseJazz – NYC Jazz Magazine App** — *Native Android | Java*

Event guide app for a New York jazz magazine active since 1982, providing monthly concert listings and venue discovery.

- Built clean, intuitive Android UI for browsing jazz concerts, events, and venue information.
- Integrated REST APIs to fetch and display live event data and venue details.
- Optimized scroll performance and navigation for a seamless content-browsing experience.

## **EDUCATION**

---

### **Master of Computer Applications (MCA)** *Aug 2019 – Jun 2021*

AKS University, Satna (M.P.)

### **Bachelor of Computer Applications (BCA)** *Aug 2016 – Jun 2019*

Pentium Point Technical College (M.P.)
