EDUCATION

Bachelor of Computer Applications (BCA)
Dr. Bhimrao Ambedkar University (DBRAU),
Agra
Specialization in Computers

TECHNICAL SKILLS

- Frontend Frameworks** ● ● ● ● ●
React.js, Redux (conceptually implied by State management), Tailwind CSS.
- Core Technologies** ● ● ● ● ●
JavaScript (ES6+), HTML5, CSS3, DOM Manipulation.
- State Management & Logic** ● ● ● ● ●
React Hooks (useState, useEffect), Functional Components.
- API & Data Handling** ● ● ● ● ●
REST API Integration, Axios, JSON, Asynchronous Programming.
- Tools & Version Control** ● ● ● ● ●
• Git, GitHub, VS Code, npm, Chrome DevTools.
- Soft Skills** ● ● ● ● ●
Analytical Problem Solving, Process Optimization, Detail-Oriented, Team Collaboration.

LANGUAGES

Native

PROFESSIONAL SUMMARY

Frontend Developer specializing in **React.js** and **Tailwind CSS** with a sharp eye for detail. Successfully transitioned from a 6-year career in **Non-Technical Quality Auditing**, bringing a unique advantage in data accuracy and process compliance to software development. Experienced in translating design mockups into responsive interfaces while leveraging a background in document auditing to ensure error-free, high-quality code delivery.

EXPERIENCE

- Frontend Developer**
iSpark IT Services PVT. LTD
01/2025 – Present | Ahmedabad, Gujarat
- **Interface Development:** Developed highly responsive web interfaces using React.js and Tailwind CSS, ensuring cross-browser compatibility and mobile responsiveness.
 - **Component Architecture:** Engineered reusable, modular functional components and managed complex application state effectively using React Hooks (useState, useEffect) to reduce code redundancy.
 - **API Integration:** Integrated backend services and consumed REST APIs using Axios, enabling dynamic data rendering and seamless user interactions.
 - **UI/UX Implementation:** Collaborated closely with UI/UX design teams to implement pixel-perfect, modern frontend solutions, translating design mockups into functional code.
 - **Code Optimization:** Focused on writing clean, maintainable code and optimizing application performance to enhance load times and user retention

- Quality Auditor (Non-Tech)**
EXL Services
2018 – 2024 | Noida, India
- **Document Compliance:** Conducted rigorous quality audits on non-technical process documents and insurance/financial records using internal tools (ECOS, Audit Central).
 - **Data Accuracy:** Validated large volumes of data entries against compliance standards, achieving high accuracy scores and reducing processing errors.
 - **Reporting:** Utilized Microsoft Excel to generate audit reports and track error trends, providing feedback to operations teams to improve process quality.
 - **Process Adherence:** Strictly adhered to Standard Operating Procedures (SOPs) to ensure 100% compliance during internal and external audits.

PROJECTS

- AI Recipe Generator** 
React.js | Tailwind CSS | AI API Integration
03/2026 – 04/2026
- Developed an AI-powered recipe generator web application that creates complete recipes based on user-provided ingredients. Integrated AI model API from Hugging Face to generate dynamic recipe responses.**
- Key Features:**
- Built a responsive user interface using **React.js** and **Tailwind CSS**
 - Implemented ingredient input system for generating AI-based recipes
 - Integrated **LLM API** to dynamically generate cooking instructions
 - Managed API keys securely using environment variables
 - Created reusable React components for better scalability
 - Implemented conditional rendering to display generated recipes
- TodoWala** 
12/2025 – 12/2025
- Built a responsive To-Do application with **real-time countdown timers**, priority management, and comprehensive search functionality.
 - Implemented **simulated backend logic** for background deadline monitoring and "Email Sent" notifications.
 - Designed a high-fidelity interface featuring **Dark Mode**, **Drag-and-Drop**, and **Canvas-based** gamification elements.
 - Ensured data persistence across sessions using a custom LocalStorage hook.
