Creative and results-driven Frontend Developer with 3+ years of experience delivering fast, responsive, and visually engaging web applications. Expert in modern UI development and seamless API integration, with a focus on performance, clean code, and exceptional user experience

SKILLS

React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Redux, basic Node.js, MongoDB, Git, APIs Integrations, SSR, CSR, Bootstrap, Tailwind CSS, Material UI, Responsive Designs, i18n, Vite

PROFESSIONAL EXPERIENCE

Websultanate Software Technologies Pvt. Ltd.

Feb 2024 - Present

- Designed and developed dynamic user interfaces using React.js and Next.js, ensuring seamless navigation and improved user engagement.
- Utilized features such as server-side rendering to improve SEO and loading times, contributing to a better user experience and increased engagement.

IPH Technologies Pvt. Ltd.

Dec 2022 - Nov 2023

- Conducted performance optimization for React.js and Next.js applications, reducing load times and enhancing overall user experience.
- Integrated RESTful APIs to enhance application functionality and provide users with real-time data access.

Mobiloitte Technologies Pvt. Ltd.

Sep 2022 - Dec 2022

- Developed backend APIs using Node.js and MongoDB, ensuring robust data management and seamless integration with frontend applications.
- Conducted code reviews and collaborated with team members to ensure best practices in UI development and API integration, fostering a culture of quality and efficiency.

ApneLog NGO

Jun 2021 - Aug 2021

- Developed dynamic web applications using Django, HTML, CSS, and JavaScript, contributing to the enhancement of user experiences.
- Collaborated with team members to troubleshoot and debug issues, ensuring smooth functionality of web applications.

PROJECTS

Luckyrush.io — US-based Live Project

- Developed the complete frontend UI using React.js, ensuring a seamless, responsive, and engaging user experience.
- Integrated all REST APIs, enabling secure payments, real-time gameplay, and reward systems (daily, weekly & monthly).
- Optimized performance and navigation with React Hooks, React Router, and reusable component architecture.

Casebench — Indian based Live Project

- Developed a Legal Management System using Python, Flask, SQL, and REST APIs, enabling advocates to efficiently manage their active cases, client details, and daily court schedules.
- Built an automated ETL pipeline that parses unstructured data from government court websites and reconciles it with internal databases using Python-based scrapers.
- Integrated automated email scheduling for hearing reminders and invoice generation, significantly improving deadline compliance and billing cycles.

Reward Management System with Multilingual Support and Admin Panel — Japanese based Live Project

- Built a Reward Management Web App tailored for the Japanese market, allowing users to collect rewards based on activity, track progress, and engage with dynamic missions.
- Implemented multilingual support, enabling users to seamlessly understand content in their preferred language, improving accessibility and user engagement.
- Developed a comprehensive Admin Panel for managing missions, rewards, and leaderboards, giving admins full control to drive user interaction and competitive ranking.

Nekrishta – Web & Mobile Application

- Developed a live matchmaking platform using React.js & Next.js with profile creation and match discovery features.
- Built and deployed iOS & Android apps, successfully published on the App Store and Play Store.
- Integrated APIs and optimized UI for performance, responsiveness, and smooth user experience.

Datawizz — Israel-based Client

- Implemented a user-centric dataset creation feature, enabling users to create and manage multiple queries within a dataset, storing the generated data.
- Integrated Open AI APIs for natural language processing, providing query-based outputs in the user-selected language for enhanced usability and comprehension.

EDUCATION

Future Institute Of Engineering & Technologies, Bareilly

2018 - 2022

B.Tech Computer Science
