EDUCATION

B.E. Computer Science & Engineering
Indore Institute of Science and Technology
2013 – 2017

SKILLS

- Flutter (Dart)
- Firebase Services
- REST APIs
- BLoC / Provider / GetX
- SQLite / Hive Database
- Git / Version Control
- Android Studio / Xcode
- Figma UI Implementation
- Blockchain Integration
- Payment Gateway Integration
- Clean Architecture
- Play & App Store Deployment

EXPERTISE

- Cross-Platform Apps
- API / UI Integration
- Fintech Development
- Performance Optimization
- Requirement Analysis
- Debugging & Testing

LANGUAGES

Hindi: Native
English: Professional

ABOUT ME

Highly proficient Flutter Developer with 5+ years of experience in developing robust cross-platform mobile applications for Android and iOS using Flutter and Dart. Expertise in REST API integration, Firebase services, fintech applications, blockchain-based solutions, and advanced state management techniques including BLoC, Provider, and GetX. Skilled in delivering scalable, high-performance applications with clean architecture, reusable components, and optimized user experience. Strong problem-solving, debugging, and team collaboration abilities with hands-on experience in production deployment and application maintenance.

WORK EXPERIENCE

SHIV TECHNOLABS PVT LTD Nov 2025 – Present
Flutter Developer

Project: British Pay (Fintech Application)
A secure fintech application providing digital payment solutions including wallet management, money transfers, QR payments, bill payments, and real-time transaction processing.
Platform: Android, iOS | **Tools:** Flutter, Dart, Firebase, REST APIs, Git, Payment Gateways
RESPONSIBILITIES:

- Developed a secure, scalable fintech app and integrated external payment gateway APIs for wallet recharges and financial operations.
- Implemented real-time transaction tracking, status updates, and designed reusable UI components ensuring an optimal UX.
- Optimized financial data processing layers and managed clean, high-performance global states using Provider and BLoC.

GFUTURETECH PVT LTD Jan 2025 – Oct 2025
Flutter Developer

Project: Realproton (Blockchain Platform)
Blockchain-powered property investment platform supporting secure token-based property ownership and token investment workflows.
Platform: Android, iOS | **Tools:** Flutter, Blockchain APIs, Firebase, Git
RESPONSIBILITIES:

- Engineered blockchain-integrated workflows and safely mapped token-based APIs with the Flutter frontend application.
- Coordinated with smart-contract developers to handle secure decentralized dashboard states and optimize rendering.

INTERESTS

- Learning New Tech
- Exploring AI Tools
- Travelling
- Listening to Music

CDN SOLUTION GROUP

Feb 2023 – Oct 2024

Flutter Developer

KEY CONTRIBUTIONS & PROJECTS:

- Built scalable enterprise architectures using Provider/BLoC while converting Figma designs into pixel-perfect implementations.
- Integrated core Firebase tools (Auth, Firestore, Push Notifications) and reduced UI rendering frame delays.

Lotus Electronics: E-commerce application featuring secure checkout workflows and extensive product management catalogs.

PolymerMIS: Petrochemical analytics software featuring price trend graphs, live alerts, and structural reports.

SYSCRAFTE INFORMATION SYSTEMS PVT LTD

Jan 2022 – Feb 2023

Flutter Developer

RESPONSIBILITIES:

- Developed highly responsive components across multiple client-focused industries utilizing clean modular frameworks.
- Synchronized closely with global backend engineering teams to ensure swift, robust REST API connectivity and deployment.

PCRAFTER TECHNOLOGIES

Jan 2019 – Oct 2021

Flutter Developer

KEY CONTRIBUTIONS & PROJECTS:

- Designed core multi-platform system architectures, systematically lowering crash metrics and optimizing internal assets.
- **Laurels School App:** Academic management application providing automated real-time student activity logs.
- **Sastarent:** Decentralized NFT token marketplace compliant with Ethereum ERC-721 and ERC-1155 standards.
