SUMMARY

MERN Stack Developer Intern with 4 months of hands-on experience in building responsive web applications using React.js, JavaScript, HTML, and CSS. Proven ability in RESTful API integration, modular component development, and performance optimization. Experienced in full-stack development with MERN stack and passionate about delivering clean, efficient, and user-centric interfaces.

EXPERIENCE

MERN Stack Developer Intern | Jan 2026 – Present | Noida, Uttar Pradesh
Bhoomi Techzone Pvt. Ltd.

- Built responsive web applications using React.js, ensuring a seamless experience across desktop and mobile devices
- Integrated RESTful APIs to fetch and display dynamic data, streamlining data flow between frontend and backend
- Enhanced code maintainability by building reusable React components, reducing overall development time
- Optimized frontend performance by eliminating unnecessary re-renders, resulting in faster page load times
- Collaborated with designers and backend developers in an agile team to deliver features on schedule
- Conducted API testing using Postman, identifying and resolving data flow issues before production release
- Delivered a complete frontend application within the 4-month internship timeline with full API integration

PROJECTS

Taxi and Driver Service (MERN / Backend Project)

- Developed a driver service web application with dynamic data handling and backend integration
- Built and integrated RESTful APIs for driver listings, service details, and contact functionality
- Implemented seamless frontend-backend communication for real-time data rendering
- Optimized API response handling and improved overall application performance
- Performed API testing and debugging using Postman to ensure reliable functionality
- Utilized React.js for frontend development and Node.js for backend operations

Interior Design Website (MERN Stack)

- Developed a full-stack interior design platform using React.js (frontend) and Node.js (backend)
- Built 8+ RESTful APIs to manage services, portfolio data, and user interactions
- Crafted a modern UI showcasing 20+ services, packages, and project details with high visual appeal
- Structured the codebase with modular components, reducing load time by 20%
- Connected frontend with backend APIs enabling real-time dynamic data rendering
- Stored and managed all application data using MongoDB with optimized schema design

Security Services Website (React)

- Built a professional website for a security services company using React.js
- Crafted an intuitive UI for service listings, company info, and contact sections
- Verified smooth navigation and cross-browser compatibility across Chrome, Firefox, and Edge

SKILLS

Frontend: React.js, JavaScript, HTML, CSS

Backend: Node.js

Tools: Git, GitHub, Postman

Libraries: Axios, React Router

State Management: Context API

Concepts: API Integration, Responsive Design

EDUCATION

B.Tech – Computer Science and Engineering

Shambhunath Institute Of Engineering & Technology (AKTU), Prayagraj, Uttar Pradesh

Dec 2025

Diploma – Computer Science and Engineering

Government Girls Polytechnic, Amethi, BTEUP, Lucknow

Jul 2022
