Summary — Passionate and results-driven Software Engineer with hands-on experience in frontend development using HTML, CSS, JavaScript, and React.js. Proficient in Java and skilled at problem-solving using Data Structures and Algorithms (DSA). Built and deployed responsive web applications with API integration. Actively seeking an entry-level software developer role to contribute to impactful projects.

Technical Skills

- **Languages:** JavaScript, TypeScript, Java, Python, C++
- **Databases:** MongoDB, MySQL, PostgreSQL, Prisma ORM, Redis
- **Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap, Material UI
- **Tools:** Git, GitHub, VS Code
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, WebSocket, JWT
- **Design Tools:** Canva, Figma, Photoshop

Projects

Movie Site

- Built a dynamic and responsive movie discovery website using React.js and The Movie Database (TMDB) API.
- Implemented real-time search, genre-based filtering, and responsive card layouts.
- Focused on user experience with loading states, API error handling, and mobile-first design.

CodeSnippet

- Developed a code snippet manager using Next.js and Tailwind CSS to store and organize code by category.
- Integrated Prism.js for syntax highlighting and local storage for offline persistence.
- Designed for developer usability with light/dark mode toggle and search filters.

Password Manager

- Created a secure password management application using the MERN stack with user authentication and encryption.
- Used JWT for session management and bcrypt for hashing user passwords.
- Built a responsive dashboard for adding, updating, and deleting stored credentials.

News Website

- Built a real-time news website using NewsAPI to fetch and display articles dynamically.
- Features include category-based filtering, responsive design, and dark/light themes.
- Integrated with RESTful APIs and added error handling and fallback UI for API limits.

Portfolio Website

- Designed and deployed a personal portfolio using HTML, CSS, and JavaScript.
- Showcases skills, projects, and contact form with GitHub/LinkedIn links.
- Hosted using GitHub Pages with responsive design and cross-browser support.

Experience

UpFlairs Pvt Ltd.

Jul–Aug 2024

- Completed a 45-day internship in MERN Full Stack Development. Gained practical experience building real-world applications with MongoDB, Express, React, and Node.js.

Learn Build

Aug 2023

- Completed a 15-day offline internship focused on Python programming basics, including OOPs, file handling, and basic GUI applications.

Volunteer Event Coordinator

Aug 2022–Jun 2024

- Coordinated and organized tech events, workshops, and coding competitions under Vigyan Bharti Rajasthan at Arya College.

Hackathon Volunteer

May 2022–Mar 2024

- Volunteered and actively participated in college-level hackathons, contributing to team-based AI and web development projects.

Education

Arya Institute of Engineering & Technology, Jaipur <i>B.Tech in Artificial Intelligence and Data Science</i>	Dec 2022–2026 (Pursuing)
Sanctum Academy, Amer Jaipur <i>12th Grade – Science (Mathematics)</i>	Passed 2022

Certificates

MERN Stack Web Dev – UpFlairs	2024	MongoDB – MongoDB University	2023
Python Programming – Learn Build	2023	Shankra Hackathon – Jaipur	2024
C, C++ – IIT Bombay (Spoken Tutorial)	2024		

Achievements

- Achievements**
- Participated in multiple global-level hackathons presenting AI-based and web development projects.
