PROFESSIONAL SUMMARY

Enthusiastic Frontend Developer (B.Tech CSE, CGPA 7.5) with hands-on experience in HTML5, CSS3, JavaScript (ES6+), and DOM Manipulation. Built a full-stack Employee Management System with authentication, input validation, and a clean responsive UI. Strong foundation in Core Java, Python, MySQL, and Git. Passionate about crafting intuitive, pixel-perfect user interfaces. Seeking a fresher Frontend Developer role in Noida or Gurgaon.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript ES6+, DOM Manipulation, Responsive Design, Bootstrap (basics)
Languages	Core Java (OOP, Collections, Exception Handling), Python, SQL
Database	MySQL — Joins, Subqueries, Normalization, Stored Procedures, CRUD
Tools	Git & GitHub, VS Code, Chrome DevTools, NumPy, Pandas
Concepts	Data Structures & Algorithms, DBMS, Operating Systems, SDLC
Currently Learning	React.js, Tailwind CSS, REST API Integration

PROJECTS

Employee Management System | Frontend + Full Stack

Tech Stack: HTML5 • CSS3 • JavaScript • Core Java • MySQL

- Designed and developed a responsive UI using HTML5, CSS3, and JavaScript with clean form validation and user-friendly navigation.
- Implemented full CRUD functionality — Add, Edit, Delete, Search employees — with real-time DOM updates via JavaScript.
- Built JWT-style authentication and role-based login flow, improving app security and usability.
- Normalized MySQL database schema (3NF) and optimized SQL queries, reducing page load response time by ~30%.

Sales Data Analysis Dashboard | Data + Web Integration

Tech Stack: Python • Pandas • NumPy • MySQL • HTML/CSS (report views)

- Processed and cleaned 5,000+ sales records using Pandas, eliminating duplicates and nulls to ensure data accuracy.
- Generated dynamic HTML report pages visualizing sales trends — monthly growth, top products, regional performance.
- Integrated Python backend with MySQL using connectors for real-time data querying and report generation.
- Designed structured layouts using HTML/CSS to present analytical insights in a business-ready format.

CERTIFICATIONS

- Core Java Programming — Comprehensive coverage of OOP, collections, exception handling, and multithreading.
- Web Development (HTML, CSS, JavaScript) — Responsive design, DOM manipulation, ES6+ features, and project-based learning.

- Currently pursuing: JavaScript Algorithms & Data Structures — freeCodeCamp (in progress)

EDUCATION

B.Tech — Computer Science & Engineering
