PROFESSIONAL EXPERIENCE

Senior Android Developer

January 2020 – Present

Nandishi Software Pvt. Ltd.

Jaipur, Raj

- Led and managed a team of 4 mobile developers (3 Android, 1 iOS), providing technical mentorship, conducting code reviews, and establishing development standards across multiple production applications.
- Architected and delivered 4 production Android applications from concept to deployment, managing full development lifecycle including Play Store launches, post-production maintenance, and feature enhancements.
- Implemented comprehensive WCAG 2.1 AA accessibility compliance in JavaScript for an AI chatbot platform, successfully passing external third-party audit and ensuring inclusive conversational experiences for users with disabilities.

KEY PROJECTS

Propvivo – HOA Management Platform | *Jetpack Compose, GraphQL, Hilt, MVVM*

2022 – Present

- Built comprehensive resident portal using Jetpack Compose and MVVM architecture with Hilt for dependency injection, enabling homeowners to manage payments, submit maintenance requests, access community documents, and communicate with property management.
- Migrated Android client from REST API to GraphQL using Apollo Client, implementing optimized queries and mutations for improved data fetching and reduced network overhead.

Tap Tap Learn – Educational Platform | *Firebase, Firestore, MVVM, Unit Testing*

2021 – 2022

- Developed multi-user tablet application using MVVM architecture with Firebase Authentication and Firestore for real-time data synchronization, supporting multiple students on a single device for classroom environments.
- Created interactive math learning modules (addition, subtraction, multiplication, division) with performance analytics dashboard and student management capabilities, implementing comprehensive unit and integration tests for reliability.

Maan Ko Saathi – Mental Health App | *ExoPlayer, Lottie, Accessibility APIs*

2020 – 2021

- Built adolescent mental health platform integrating interactive stories, custom animations, ExoPlayer video integration, and mood tracking features with full accessibility compliance.
- Implemented WCAG accessibility standards using Android Accessibility APIs, ensuring seamless experience for users with disabilities through proper TalkBack support and content descriptions.

PG Management System | *NFC, Room Database, Material Design*

- Developed hostel management application with NFC-based check-in/check-out system using Android NFC APIs, enabling contactless room assignments and automated attendance tracking.
- Built admin dashboard for room allocation with NFC tag writing capabilities, implementing Room Database for offline data persistence and seamless management of room assignments and resident information.

SIDE PROJECTS

Spice E-commerce App | *Android, Paytm Gateway, Firebase*

2020

- Built e-commerce Android application for spice business featuring product listings, shopping cart functionality, and integrated Paytm payment gateway for secure transactions.

Grey Space Furniture | *GatsbyJS, Firebase Auth, React*

greyspacefurniture.com

- Developed product listing website using GatsbyJS with Firebase Authentication, showcasing furniture catalog for local business with responsive design.

SPL (Sain Premier League) | *Next.js, React, Admin Portal*

spl12.in

- Created tournament management website for local cricket league with player registration, team management, announcements, and admin portal for organizing tournament operations.
