Education

ITM University

Bachelor of Science in Computer Science

Sep. 2022 – May 2026

Gwalior, Madhya Pradesh

Y Combinator Startup School

Learned startup fundamentals including MVP development, user validation, and product-market fit.

Jun 2023 – Jul 2023

Relevant Coursework

- App Development
- Networking
- Web Development
- Data-Structures
- Api Development
- Databases Design
- Analysis / Monitoring
- AI-Integration

Experience

Rudratek

Mobile Development Engineer (React Native)

March 2026 – Present

Freelance

- Implemented an Offline-First architecture using local storage and background sync, ensuring uninterrupted app usage and automatic data reconciliation in low-connectivity environments.
- Integrated Supabase client for authentication, real-time data syncing, and backend services, enabling secure user sessions and efficient API interactions within the mobile app.
- Developed a cross-platform file upload system (PDFs, images, documents) with progress tracking, retry mechanisms, and optimized state management using Redux/MobX.

TON Foundation

TON App Builder

July – Oct 2025

- Developed and deployed TON-based mini applications with wallet integration and on-chain interaction flows.
- Implemented smart contract communication logic and Telegram Mini App integrations within the TON ecosystem.
- Made Mini Apps using Telegram SDK, Next.js and wallet connection.

Cyfrin Updraft

Chainlink Fellowship (Developer Program)

June – July 2024

- Built and tested smart contracts utilizing Chainlink VRF for provably random and secure on-chain execution.
- Implemented automated smart contracts using off-chain triggers and Chainlink Automation.
- Studied and applied Decentralized Oracle Network (DON) architecture for secure real-world data integration.
- Contributed to technical documentation and peer knowledge sharing within the Chainlink developer ecosystem.

Projects

Hacker News App | TypeScript, React Native, Expo, React Query

Live

- Built a Hacker News client with React Native supporting 500+ stories and threaded comments, implementing React Query caching that reduced API calls by 60%.
- Implemented optimistic UI updates with React Query to improve feed responsiveness and reduce unnecessary network requests.

Trace AI | Next.js, TypeScript, Groq API, React Flow, shadcn/ui

Live

- Built an AI-powered query visualizer that converts prompts into interactive node-based graphs, improving reasoning transparency and schema understanding.
- Integrated Groq API with React Flow to enable real-time structured output visualization of database relationships and query flows in a performant UI.

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, SQL (PostgreSQL), Solidity, C/C++, HTML/CSS

Frameworks & Runtimes: React, React Native, Next.js, Expo, Node.js, Elysia.js, Gin, Expo.

Libraries: React Query, ShadCN UI, Ethers.js, Prisma ORM, WebSockets

Tools & Platforms: Git, Docker, Vercel, Netlify, Supabase, Hardhat, Inngeist, AgentKit, VS Code

Leadership / Extracurricular

University Hackathon – Unistream

2025

Developer

University Hackathon

- Built a live content streaming prototype with real-time updates under hackathon constraints.
- Contributed to a college Android application, implementing features and fixing bugs to improve usability and performance. Participated in GDG technical workshops and community events covering web development, mobile apps, and modern frameworks.
